Research and Terminology Assignment

Section 1
Foundational Concepts of Analytics

1. **Business Analytics** - a process of using data to analysi business performances and make informed business related decisions.

* example: Business owners uses data analytics from retail stores to identify customer loyalty and predict demand

* source:
Matt Gavin / Havard business School. 2019. Business Analytics ; what it is & why it's so important. Havard business School online. hbs.edu / blog / post / importance-of-business-analytics

2 DATA ANALYTICS
- A process of converting any raw data into meaning-full insights used to make ~~de~~ better and informed decisions

* example: Bakery who analyses sales every Friday and see that each day they sold more chocolate stuffed donuts than carrot muffins, they will use this data to make a decision of stocking more chocolate for [redacted] donuts [redacted] and less carrots for muffins.

SOURCE:
Coursera. 2025. What is data analysis? (with examples)
coursera.org/articles/what-is-data-analysis-with-examples

OVERLAP: BA / DA
- BA is mainly focused on using data for business decision making & strategies for the future, while DA focuses on general, various data for any industry to make any informed decision.

(3) BUSINESS INTELLIGENCE (BI)
- Process of mananging, collecting and analysing that is used for business strategies & operations unlike BA, BI deepen the focus into building ~~Strategt~~ strategies the business will follow going forward and improve operations

* Example: clothing store uses sales data and weather forecast to strategise by increasing stock of Jackets and boots when its expected to be cold for next 2 weeks.

SOURCE:
IBM. 2026. What is business intelligence (BI)?
ibm.com/think/topics/business-intelligence #

SCAN AnyScanner

(4) DATA-DRIVEN DESICION MAKING

- this is a process of making decision based on factual data / information. rather than feeling.

Example: Supermarket that choses to stock more flavoured water because sales show that they sell more than sparkling water.

SOURCE:
IBM. 2026. what is data-driven decision-making?
ibm.com/think/topics/data-driven-decision-making#

(5) BIG DATA

- big data refers to large amount of data that is collected from many sources and grows quickly over time

EXAMPLE: Social media collects lots of posts likes and comments within minutes which the grows to big data quickly

SOURCE:
Michael Chen / Oracle. 2024. What is Big Data?
oracle.com/africa/big-data-/what-is-big-data/

SCAN AnyScanner

⑥ DESCRIPTIVE ~~ANAYSIS~~ ANAYTICS
- process ~~of~~ looking at old data to understand what had happened.

EXAMPLE! King Pie can use previous sales data to analyse customer behavior by identifying which pie flavours were top sellers.

SOURCE!
Catherine Cote / Harvad business school. 2021
what is descriptive analytics? 5 examples
online.hbs.edu/blog/post/descriptive-analytics

⑦ DIAGNOSTIC ANAYTICS
- Process of analysing data to figure out why something happened

EXAMPLE! Supermarket experiencing drop in bread sales and identifying it is due to ~~the~~ bread price increase

SOURCE!
Judith Aquino & Alexandra Jonker / IBM. 2026. What is diagnostic analytics? ibm.com/think/topics/diagnostic-analytics

SCAN AnyScanner

(08) PREDICTIVE ANALYTICS

- process of analysing data to guess what is most likely to happen in the future.

EXAMPLE: Retailers can predict higher sales in the last week of the month due to being a pay week for most customers.

SORCE:
Cloud. 2026. what is predictive analytics?
cloud.google.com/learn/what-is-predictive-analytics

(9.) PRESCRIPTIVE ANAYTICS

- process of using data to suggest what actions to take in the future

EXAMPLE: ~~Su~~ Shoprite can run specials to boost sales i.e. combo deals or buy 2 and get discount on certain products

SOURCE:
Cole Stryker / IBM. 2026. What is prescriptive analytics?
ibm.com/think/topics/prescriptive-analytics #

(10) Data literacy

- refers to the ability to interprete, understand and use data in a way that you can communicate it with others

Example: being able to explain data graphs and tables to others

SOURCE:

tableau. 2026. What is data literacy? Tableau. tableau.com/data-insights/data-literacy/what-is

SECTION 2

Data, Measurement & Reporting

(11) STRUCTURED DATA

- refers to data stored in a organised and consistent readable format

EXEMPLE: ORDER TABLE

Order ID	Product	PRICE	Quantity
341	Street wise 1	R30	1
342	Family meal	R99	1
343	Dunked wings 4	R40	2

SCAN AnyScanner

(12) UNSTRUCTURE DATA
- Refers to raw, unfilterd data that does not consist of a format.

- EXAMPLE: Social media facebook posts Instagram / TikTok Videos

(13) DATA WAREHOUSE
- refers to a large central place where multiple database are stored.

EXAMPLE: Amazon Redshift - cloud base data warehousing service.

(14) Data Mining
- refers to the process of understanding collected data by cleaning and vetting data while identifying its patterns

EXEMPLE: Makro online platform collects data / information from sellers & buyers to identify patterns

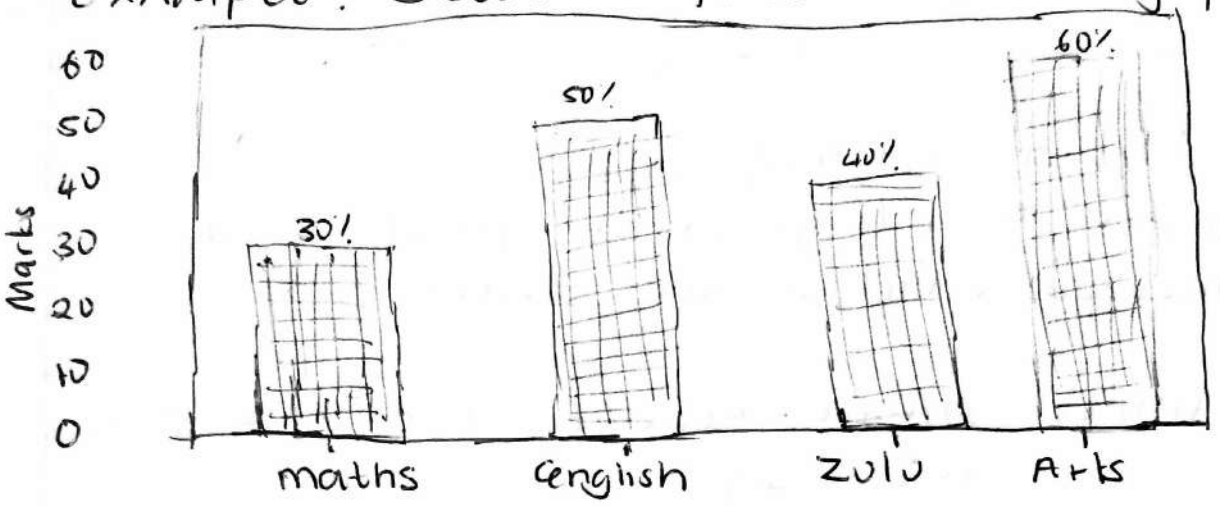
SOURCE:
Alexandra Twin / Investopedia. 2026. Introduction to data mining. investopedia.com/terms/d/datamining.asp

SCAN AnyScanner

(15) DATA VISUALAZTION

- process of turning data into readable visual. like bar graphs and charts

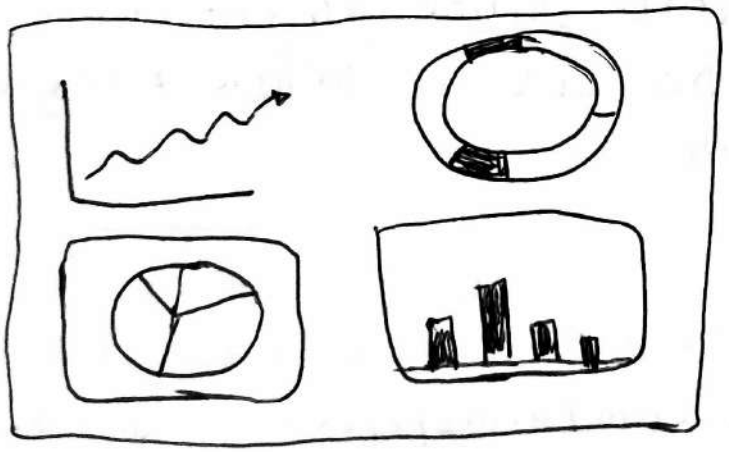
EXAMPLE: Students Performance bar graph



(16) DASHBOARD

- dashboard refers to a screen display of all visual data information in one place

EXEMPPLE:



SOURCE:

tableau. 2026. What is a dashboard? A complete overview tableau.com/dashboard/what is a dashboard

(17) METRIC

- refers to a value used to measure or track performances in data for strategy use or progress

EXAMPLE: Calculating number of sales for the week (80 Pies)

SOURCE:

geeksforgeeks. 2024. what is a metric in analytics? geeksforgeeks.org/data-analysis/what-is-a-metric-in-analytics/

(18) KEY PERFOMANCE INDICATOR (KPI)

- a type of metric that only measures or ~~show~~ is used to show indication whether a set goal or target is met.

EXAMPLE: Calculating to see whether number of targeted Pies sales for the week is met - (80 Pies) target (100 Pies)

SOURCE:

Quantive. 2025. What are KPIs? Quantive. quantive.com/resources/articles/what-are-kpis

OVERLAP:

Metric - measures perfomance for progress

KPI - measures performance for target goal

AnyScanner

(19) BENCH MARK

- refers to a process used to measure and compare performances across business.

EXAMPLE: Comparison of Sales

SOURCE:

Nicole Fallon/Business news daily. 2023. Business news daily What is benchmarking in business? businessnewsdaily.com/15960-benchmarking-benefits-small-business.html.

(20) SEGMENTATION

- In data, segmentation refers to a process of dividing large information and put into smaller groups by catagory

EXAMPLE: A retailer DA can group their customer data based on gender & age.

SOURCE:

Coursera. 2025. What is data segmantation? Coursera coursera.[redacted]org/articles/data-segmantation

SECTION 3
Customers & Sales KPI's

(21) Conversion RATE
- refers to a number of people / customers who tak a specific action

EXAMPLE: 100 customers viewed airfryers on Take-a-lot, only 10 customers buy = 10% of conversion rate

SOURCE:
Cousera. 2025. What is conversion rate? cousera
cousera.org / articles / what-is-conversion-rate

(22) CUSTOMER ACQUISITION COST (CAC)
- refers to the total amount of money a business spends in order to get a new customer

EXAMPLE: a company can spend R1000 in advertising and get 10 customers which results to R100 per customer.

SOURCE:
zendack. 2026. What is customer acquisition cost (CAC). zendack
zendesk.com/blog/sales/sales-perfomance-metrics/customer-acquisition-cost/

SCAN AnyScanner

(23) CUSTOMER LIFETIME VALUE (CLV/LTV)
- refers to a total amount of money each customer brings into a business over time

EXAMPLE: A customer that buys baby diapers worth R300 every ~~month~~ month brings in R3600 into a retailer in a year

SOURCE:
Teaganne Finn / Amanda Downie / IBM. 2024. What is a customer lifetime value? (CLV). IBM. ibm.com/think/topics/customer-lifetime-value.

CLV : CAC ratio is a ratio of the customer lifetime compared to it acquusation cost, this ratio is always expected to be balanced or perfect

(24) CHURN RATE
- refers to a percentage base on a number of customers who stops buying product from a company

EXAMPLE: 10 out of 100 customers stop buying products = 10% churn rate

SOURCE:
Cousera, 2025. what is churn rate? Coosera. cousera.org/articles/what-is-churn-rate

(25) CUSTOMER RETENTION RATE

- refers to a number of percentage of customer who continue to stay and purchase products

EXAMPLE: 90 out of 100 customers contive to buy products = 90% ~~lets~~ retention rate

SOURCE:
Sam Edwards/Amplitude. 2025. What is customer Retention amplitude.com/blog/customer-retention.

(26) NET PROMOTER SCORE (NPS)

- refers to a metric that measure how likely the customers are going to recommend your products to other people.

EXAMPLE: after a call with a service ~~provider~~ Provider they ask you to stay online and ~~rear~~ rate their services based on the scale of 1 -10

SOURCE:
Sciencedirect. 2026. Net Promoter score. Science direct sciencedirect.com/topics/computer-science/net-promoter-score

(27) AVERAGE ORDER VALUE (AOV)

- refers to the average amount of money that customers spend in ~~your~~ a busines based on each Purchase

EXAMPLE: R1000 sales based on 10 orders is equal to R100 average order value

SOURCE:
JJ Reynolds/Vision lab. 2026. Average order Value
visionlabs.com/metrics/AOV/

(28) SALES FUNNEL

- refers to a customers journey from identifying a desired product up to purchasing of the product

EXAMPLE: Seeing Airfryer ad on facebook, follows ad to Makro website, add airfryer to cart & purchase.

SOURE:
Salesforce. 2024. what is sales funnels.
salesforce.com/in/blog/sales-funnel-2/#

SECTION 4
MARKETING & CAMPAIGN ANALYTICS

(29) MARKETING CAMPAIGN

- a long term planned promotion of products with a goal of increasing sales.

EXAMPLE: A Retail plans and selects products to promote for Black Friday.

SOURCE:
CFI team. Coporate finance istitute. 2020. what is market campaign. coporate finance institute.com/resources/management/marketing-campain/

30) POST - CAMPAIGN ANALYSIS

- refers to a process or reviewing how the campaing perfomed using Incremental ~~reve~~ revenue and ROI as point of judgement

- EXAMPLE: Retail will check a percentage of Increased Sales after Black friday

SOURCE:
eduwik. 2025. Post campaign analysis. eduwik
eduwik.com/post-campaign-analysis/checklist/

31) INCREMENTAL REVENUE

- refers to extra income recieved from a specific promotion or campaign; this information is also used to ~~as~~ run a post campaign data analysis

EXAMPLE: A total amount of R10 000 is calculate after Black friday promotion

SOURCE:
Skylead. 2026. Incremental revenue. Skylead.
Skylead.io./sales-glossary/1/incremental-revenue/

32) RETURN ON INVESTMENT (ROI)

- refers to a metric used to measure the amount of profit made compared to the money spent on a promotion/campain; this information is used in a post campain analysis to determine whether a campaing was a success or failure.

EXAMPLE: If a retailer spend R2000 in a Compaig & earn R4000 in return it mark as good return on Investment

SOURCE:

Marcin Majka. ResearchGate. 2024. Understanding Return on Investment (ROI). ResearchGate. researchgate.net/publication/381402537_Understanding_Return_on_Investment_ROI

(33) RETURN ON ADS SPEND (ROAS)

- refers to the amount of money earned from money used on advertising

EXAMPLE: If you spend R300 on google ads and make R1000 from traffic caused by Ads = Good ROAS

SOURCE:

Amazon. 2021. What is return on ad spend (ROAS)? Amazon advertising.amazon.com/library/guides/return-on-ad-spend-roas#s

(34) CLICK THROUGH RATE (CTR)

- refers to the number of people who clicked through an online ad as an engagement

EXAMPLE: A facebook ad pops up and the product looks Interesting, the customer will Click on the ad and be directed to the website for just browsing or purchasing

AnyScanner

SOURCE:
Adam Hayes. [redacted] Investopedia. 2026. Understanding Click-trough rate (CTR). Investopedia. investopedia.com/terms c/clickthroughrate.asp.

(35) BOUNCE RATE
- Bounce rate refers to the number of people or ~~customer~~ potential customers who ~~leaves~~ leaves the website without buying anything

EXAMPLE: When someone lands on a Makro website and quickly close without browsing or buying anything

SOURCE:
coursera. 2025. What is bounce rate? coursera coursera.org/in/articles/what-is-bounce-rate

(36) A/B Testing
- a ~~compara~~ process of comparision where two methods are tested to determine the one that will produce better results

EXAMPLE: testing 2 different ad designs to see which one attracts more customers or get more clicks

SOURCE:
Adobe. 2025. A/B Testing - what it is, examples and best practises. Adobe business. business.adobe.com/blog/basics/learn-about-a-b-testing #

(37) LEAD GENERATION
- a process of identifying or marking potential customers for your business

EXAMPLE: ~~SOCI~~ social media content engagement

SOURCE:
Adobe Cloud team/Adobe. 2025. Lead generation explained business.adobe.com/blog/basics/lead-generation.

(38) MARKETING ATTRIBUTION
- refers to the process of identifying which marketing strategy brings in more sales to the business

EXAMPLE: If more customers buy after seeing the Facebook ad, the business will use facebood ads often as a credible strategy

SOURCE:
Marketing Evolution. 2022. What is Marketing attribution: a full guide. Marketing Evolution.
